1. **Open a New document by choosing File** → **New**. 2. **Create a new canvas, 1600 × 1200 pixels**. This size makes it easy to manipulate on the screen and print, which is recommended. If you don't want to use a canvas, you can open a new document by choosing File → New. In a new document (covered later in this chapter), you can also choose File → Document Setup, and then click the Size pop-up menu and choose Create a New Document Size (recommended). 3. **In the Toolbox, click the Brush tool and choose the pen nib from the tool options, as shown in Figure 7-1**. This tool is different from the Ink tool because it doesn't have a preview grid. You must use the context-sensitive menu to choose what size of brush you want. The size menu's four choices provide brushes with different hardness (hold down the Alt key and click to set it). Figure 7-1. Top: The Brush tool offers you a choice of nib sizes in the Tool Options menu. In this example the size is set to Very Soft. Bottom: The Brushes palette, where you can choose colors for your work.
