As a motivation, I have been wondering about the dependence of the norm on inclusion of the center of the normed ring in the normed ring (as to whether it maps to the entire center or not). I was thinking of the natural map $A\otimes A\rightarrow A$ given by $a\otimes b \mapsto ab$, but I do not know if there exist algebra homomorphisms from the algebraic tensor product to A that are not isomorphisms. A: Let me start with an
