BS ISO 6164 is the international standard specification for the fabrication of. Load testing of bolted flange connections according to the BS EN ISO 6164. The load-carrying capacities in this specification. Load-bearing flanged connections should be designed for the fixed. British Standards Institution. To provide a connection arrangement for a load-bearing connection between an outer surface and an internal surface of a plate or a plate-like member, according to certain preferred arrangements,. (fk) 1: ISO 6164 free download. Anti-inflammatory mechanism of the lung: role of aminopeptidase M and tissue inhibitor of matrix metalloproteinase-1. Aspenins are a group of small peptides secreted from the immune cells that regulate the inflammatory processes and are believed to play a critical role in the pathogenesis of many inflammatory lung diseases. The present investigation was undertaken to elucidate their exact mechanism of action in producing their anti-inflammatory effect on mouse lung inflammatory model. The in vivo effect of aspenin 1 (or FLL), a well-known aspenin analogue, was examined in experimental mouse lung inflammation model. In vitro effect of aspenin 1 on the production of inflammatory mediators (nitric oxide, prostaglandin E(2) and leukotriene B(4)) by polymorphonuclear leukocyte (PMNL) was also determined. Aminopeptidase M (APM) inhibitor, amastatin, was also used to investigate the role of APM in regulating the effect of aspenin 1 on the production of mediators from PMNL. In vivo study revealed that topical application of aspenin 1 significantly reduced the protein level and the protein activity of matrix metalloproteinase-9 (MMP- 0cc13bf012
