The successful implementation of "HyperMotion" technology means that FIFA 22 uses thousands of new animations - more than in any other game before - thanks to the performance and processing power of the new PlayStation®4 Pro hardware. Additionally, "HyperMotion" technology enables the movement of players on-field and off-ball to be more realistic, dynamic and effective. For the first time, EA SPORTS™ FIFA will offer a wide range of characters in the 25 national team kits, from the USA, Brazil, Argentina, Spain, Germany and many more. Players and teams in FIFA's history now have new, more authentic versions of their on-field presentation. The introduction of a new football experience within FIFA, alongside the recent updated ball physics, means that FUT Champions is becoming more accessible and more intuitive than ever. FIFA continues to evolve in FIFA Ultimate Team in 2017, with a series of new features, including the new "My Team" mode, a new "My Squad" mode, new rewards, new seasonal events and more. FIFA 17 introduced "El Clasificador," the all-new statistics and highlights breakdown section. This feature allows players to review and see stats for all their club's players, including assists, shots, key passes and yellow/red cards. For the first time, FIFA 17 will offer real-life commentary, as in real matches, from Brent Paterick, who has more than 25 years of experience of commentating for the Premier League. FIFA 17 is already the best-selling football simulation on PS4, and is one of the fastest-selling games in PlayStation®4 history.
