I am working on a project where I need to get a list of all Bluetooth headsets and their names. I am using Python 3.5.2. I am able to connect to the headset and I am able to get the device name. But I am stuck as to how to get the complete list of the connected Bluetooth devices. This is the code I have tried so far. import socket import smtplib from email.mime.multipart import MIMEMultipart from email.mime.application import MIMEApplication from email.mime.audio import MIMEAudio HOST

= "00:1A:3D:9F:36:48" PORT = 4444 clientsocket = socket.socket(socket.AF_INET, socket.SOCK_STREAM) clientsocket.connect((HOST, PORT)) clientsocket.settimeout(30) message = MIMEMultipart() message["To"] = ['myemail'] message["From"] = ['myemail'] message["Subject"] = "test" message.attach(MIMEAudio('media/sound.wav')) message.attach(MIMEApplication('text', 'plain', 'utf-8'))

Space Shuttle Program At left, the Shuttle Carrier Aircraft (SCA) makes its way down the runway at Kennedy Space Center during the Advance Scavenging Rendezvous (ASR) processing. The wing is supported by a deck built to rig and hoist the International Space Station (ISS) into a horizontal position, ready to be maneuvered into place.The SCA is designed to land on a mobile runway in any of NASA's major facilities, including Kennedy Space Center, Wallops Flight Facility, Ames Research Center, Langley Research Center, or Dryden Flight Research Center. The SCA serves as the link between commercial and government space transport services. Related Articles What is the Recovery and Relocation Vehicle (R/RV)? A special vehicle is developed to transfer astronauts from their cabin module to the International Space Station (ISS). This is usually done when an astronaut is in a critical status, such as requiring medical attention or critical systems are not functioning properly. The R/RV can hold up to four astronauts, or a crew of six astronauts (including the commander and mission specialist). The R/RV is "retrofitted" from a Russian Soyuz spacecraft. It also must be capable of transporting both adults and children, as it is assembled to hold people in a lunar or Earth "lunar" habitat. The R/RV is completely renovated in a Russian factory and assembled in Houston. Then it is flown to NASA's Johnson Space Center in Houston for final outfitting, and then returned to Kennedy Space Center. Who built the R/RV? The Recovery and Relocation Vehicle (R/RV) was built by Boeing. (Boeing is also building the Orion spacecraft for future exploration missions.) When was the R/RV built? The R/RV was built in two phases. The first

The world becomes more and more complicated with time. On the other hand, computers become more and more powerful. One of the most popular choices today is Windows 10. It is based on the Windows NT kernel and introduces a new user experience. Windows 10 allows you to use various resources. It supports touch technology, dual-screen, Microsoft Office applications, and so much more. You can benefit a lot from using Windows 10. You also have the freedom to customize the OS as much as possible. Windows 10.1 Build 1607 is available for Windows 7, 8, 8.1, and 10. The new operating system offers some amazing features. Some popular examples are touch functionality, artificial intelligence, and so much more. You also get the Fluent Design option. It is an interesting feature that allows you to make the interface of Windows 10 look like Windows 7 or even Windows XP. Windows 10 Download Windows 10 is designed in such a way that it is accessible to any type of users. It is considered to be one of the most reliable operating systems. This is true because Microsoft has spent a lot of time to improve the user interface of Windows 10. You can easily make things available to anyone. Windows 10 is a good alternative to Windows 8. For those who are searching for a fast and reliable operating system, it is the one you should use. The positive aspects of Windows 10 include its interface, security, reliability, and stability. One thing you should note is that the operating system is based on the Windows NT kernel. When you buy Windows 10, you will have the option to upgrade or buy the OS offline. You will get Windows 10 Pro, Home, or Education. You will also get the option to update or install on one PC or install on multiple ones. This operating system will work on computers with processors that are based on the Intel, AMD, or ARM architecture. Furthermore, the operating system will be compatible with the following: Windows 7, Windows 8, and Windows 8.1. This means that it will work with both 32-bit and 64-bit processors. You can download the Windows 10 ISO (Disk Image) from the Microsoft official site. Each of the Windows 10 versions has different features. The features are available to you when you install the operating system. One example is that you can choose to install the 64-bit version. The good thing about this option is that it gives you access to more
