Armageddon is an action-RPG set in a late-40K universe where the races struggle for the last relics of the dead planet Armageddon against the host of corrupted Eldar, the Great Father, and his Ork hordes. With science fiction turned into an Epic struggle for survival, combat consists of engaging between two colossal walking machines; all of them, Orks and Space Marines, are ranged and melee fighters. This new expansion takes the Ork and Inquisitor (from the main game) units, and adds new melee units and new mechanics to Ork Hunters: New Ork Hunter units: - Feral Wildboyz, Huntas, Boarboyz, and Junkas. New Imperial ork units: - Infantry, Flamers, Anti-Tank Support, Fire Support, Sniper. New ork Hunter units can be used in order to block enemy lines and split them, they can be used as specialised skirmishers that can easily overwhelm a group of regular Orks, they can help their allied unit with direct attacks or they can be sent to different enemy locations to help defend them. This expansion adds new features to the Ork Hunters: - Ork Hunters can be used in order to receive the support of allies in the form of Support Defense Points from their allies- Ork Hunters do not use weapons or armor, and they are the perfect allies for Space Marine's and Eldar units in order to cover their gaps during battles. - The support has a duration defined by the Ork Hunter itself, being enough to be useful but not too long to be abused. - Ork Hunters have a Life equal to that of the Space Marine unit they are supporting (this effect can be buffed by Strength Buffers or defused by Defense Points from the allies.) - Ork Hunters regenerate their Life after each mission. - Ork Hunters are fast and can move during missions in order to reach their goal in a shorter amount of time. - Ork Hunters can be issued with a different set of weapons and abilities in each mission based on the tasks of the missions. - A high amount of research points is necessary to obtain new units and new weapons. Ork Hunters expands the capacity of the 4 missions available in Armageddon, adding a great content, with more quests, more details and more story, to Ork Hunters. It is the first official expansion of Warhammer 40,000: Armageddon. Reception References External

Official Website Negative Nancy is a point-and-click adventure game about Nancy Drew-style investigations and the strange cases encountered in our everyday lives. Negative Nancy, unlike most of her non-canon counterparts, is more of an antagonist than a playable character. She is an eccentric friend/housemate of Nancy Drew's and assistant, and is not exactly a friend/housemate/assistant to Nancy. She is a very "negative" woman who knows how to be negative in a very upbeat and shiny way. In short, she's the opposite of most of Nancy's friends, but the game tries to portray her in such a way that she can be your friend (but only if you like that kind of friend). The game began development in 2011 and was officially announced on August 2nd, 2013. It was released on Steam on May 27th, 2014. Currently the only series of episodic games, Negative Nancy will become a franchise of its own.
