A series of 3-cyano-4-aryl-2-pyridyl-diazines 7a-h and 9a-h were synthesized by three different routes. The structures of synthesized compounds were confirmed by elemental analysis and spectral data. The cytotoxicity and DNA binding potential of these compounds 7a-h and 9a-h were

determined. The results of DNA-protein interactions were monitored by absorption spectroscopy, thermal denaturation of DNA by spectrofluorometry and viscosity measurements. Docking simulation with DNA oligomer was also performed to find out its binding mode with DNA. BTW, this is not a personal request. I just wanted to share my idea, hoping that it would inspire some creativity in someone. Liked it very much! I don't remember what you was saying about the ending, but I guess you should have a clear idea in mind before drawing or drawing first and just voice it. I was a bit confused about Shurit's last (human) words, she said "God, I hope it's not a lie". That was the "reversed" version of Ryo's last words, "I hope it's not a lie". Of course, this is all just a hypothesis and is not at all confirmed. If you do decide to create a sequel, I'd be really happy to see what you can make of it! :)in vivo* and minimize the variability as each experiment is performed using freshly harvested cells.
