In the poly(arylene sulfide)s heretofore produced, a poly(phenylene sulfide) mainly composed of an unreacted poly(phenylsulfide) is formed in an amount of about 30 to 60% by weight and, moreover, the repetition of heat treatment or the like causes the remaining poly(phenylene sulfide) to undergo sulfidization, thereby deteriorating the mechanical

properties. In order to solve such a disadvantage, it is considered to conduct a complicated reaction comprising a plurality of steps. In the control of such a reaction, however, it has been very difficult to easily control the reaction ratio of the individual reaction steps. (2) It is to be noted that the poly(phenylene sulfide) has extremely poor heat resistance and mechanical properties and also has a low melting point and a low glass transition point. It is, therefore, desired to improve these

properties.This is My England "This Is My England" is a song performed by English electronic music band Depeche Mode.
