StarCraft2: The Original Game, was first introduced in 1998 and has continued to be a worldwide phenomenon, more than a decade later. Now, the company is back with an update to one of the most popular titles in the series; StarCraft 2: Wings of Liberty, or Wings as it will be known in the future, has managed to bring a new side of Protoss, Terran, Zerg, and Wings alike to its players. After taking a few moments to familiarize yourself with the new UI and overall design, you are directed to the Terran story arch, a more streamlined approach to the campaign that makes the whole experience less cumbersome. Winging your way through the campaign and into the full game will be made much easier, with only a few missions still requiring you to quest in the online aspect of the game. These range from simple PvP missions that yield an easy amount of XP, to the end-game content required to complete the campaign missions. You start the campaign from mission one, and now have a series of levels, or missions, to take part in. This isn't necessarily a bad thing, but it is noticeably different from the original game. The first mission in the Wings campaign is unique enough to stand out, but the story has been streamlined into a series of smaller, more intense missions. It is easier to get into, and more apparent where you should be focusing your time. Wings itself is a vast campaign filled with enemies from different races, both in single player and multiplayer. Wings from the other races don't really effect your progress with the story missions, but overall, Wings is easier and more action-packed than the original game. You will no longer be able to easily sneak past by enemy bases, after all. The other races in Wings are almost in the exact same place in the development as in the original StarCraft, yet they are completely different; from the look of them to the gameplay of them. The Protoss feel much like the Terran, the Zerg much like the Protoss, the Orcs look a little like the Zerg, the Terrans feel like the Protoss, and the humans look like the Orcs. Almost everything feels the same, but with a new coat of paint. Perhaps the biggest change in this game would be the gameplay that sets it apart from the rest of the StarCraft series. Wings have a new interface that is different from the predecessor, but still

feels like StarCraft. The game has three central elements; control, units, and abilities. Like any good StarCraft
