Using "Wrestle" to change your opponents! The wrestler that uses a lotion to achieve a lot of velocity! Let's find the ultimate wrestler in martial arts! Don't miss out the unique characteristics of the wrestler! A lot of new magic effects that you've never seen before! Catch up on martial arts legendary wrestlers!

1.The Game's Story The setting is the Warring States period, where feudal lords were in a constant state of war. The capital was in the Hsienang Palace (present-day Taipei, Taiwan). Nobunaga (Oda Nobunaga) and Abe Seimei, the former Yin-Yang masters, kicked off the modern era when they were implanted with skills from times long past, trying to become the ultimate samurai. But if they fail, they will lose their lives.

2.The game version of the feudal lords are available as playable characters in the game's story mode, and the player can also choose any of the playable characters in the game's free battle mode. The goal of the story mode is to find and defeat Takeda Shingen. The goal of the free battle mode is to defeat the other three warlords by collecting as many muskmelons as possible.

3.Game Mechanics To achieve your goal, use the attack button to leap into the air and slash at the opponents. To avoid the enemy attacks and daze the opponents, slash the walls with the wall button. Once you attack, you'll use the attack button to perform special techniques that you can use to gather more momentum to your advantage! In addition to these attacks, you can change Oda Nobunaga to a lotion samurai and Abe Seimei to the yin-yang master to change their capabilities. As a lotion samurai, you can use "wrestle" to convert your opponent into a lotion and use it to your advantage. By combining the techniques of your opponent and using the different attributes of a lotion samurai and yin-yang master, you can perform unique attacks that you've never seen before!

4.Battle Mechanics Real-Time Battle A lot of tons of enemies will attack the character at the same time. It's always best to dodge them or use the walls to attack! Combo and Special Attacks Enemies will change as you increase their rage! Attack them while they are in pain to perform a special attack! One Hit Kills Quickly dodge enemy attacks

CAYNE the Ultimate Action/RPG Game is a blend of the most powerful and promising genres of the last decade: Action-RPG and Adventure. The game offers exciting Gameplay with real-time strategy combat. An original world with a huge amount of content that invites you to dig through to discover the story. Pushing the boundaries of what the genre can offer the player. CAYNE has huge world with over 30.000 new words to discover, exploring large environments. The world is populated with thousands of non-player characters and hundreds of buildings, each with a unique story and meaning. CAYNE is the most realistic, yet ever thrilling Action-RPG to be released for VR. A spiritual successor to classics such as Final Fantasy VII, The Elder Scrolls 5: Skyrim, and Earthbound. Platforms: PC, XBOX One, XBOX 360, PS4 Caster Conexio is the first Dual Reality Controller shipping with its own experience for its fun and innovative gameplay in VR. You can meet his team in one of the most illustrative and interesting theaters in the world where the Conexio team has been present in Catalonia for the last 6 months. Enjoy and download the workshop and game for free, enjoy it and be the Caster Conexio For more Caster Conexio Studio, please subscribe to our studio newsletter! Thanks to the Caster Conexio Studio, we have a chance to present the CAYNE VR Experience. We are very excited for this new release in the VR Conexio Studios. Being a loyal fan of CAYNE we were only one step from a VR reality and experienced this first-hand moment when we were able to play CAYNE VR at VR Tech Fest Barcelona. Based on the original CAYNE video game we would like to introduce the player to CAYNE's world: The CAYNE_i VR experience is an immersive game that uses several technologies to give a truly fantastic experience to the player, which will allow them to experience the world of CAYNE_i VR, where the player will encounter amazing environments, each with its own characters, time and place. We started working on this project in August 2017, where we have already seen many technical milestones that enable us to present this first version of CAYNE_i VR, an experience we are very proud of. We invited the Conexio team c9d1549cdd

[url= the game is in Greenlight![/url] Hi, I am working on a game, and I was wondering if any of you ever came across a similar effect in your game development. What I am trying to do is, to be able to search an object in a group of objects and bring up another group of objects. Say I have a collection of objects - such as I created them (polygons and sprites) by hand, I could theoretically search an object (polygon or sprite) and bring up another collection of objects (by tagging one object with another object's name). This would ideally make it easier for the player to just search for that object they were looking for and it would save them some time if they wanted to search for objects in large groups. What do you think? I would like to know if anyone has come across something like this. It also would be really helpful if there was any sort of explanation on how this sort of thing would work. Thanks. King's Munchkin. TheMuncher 03-23-2011, 12:58 AM Hi, I am working on a game, and I was wondering if any of you ever came across a similar effect in your game development. Thanks. I suspect we are going to go for a fairly light-weight solution for this in our engine. We are going to have objects on the map marked as red, green or orange depending on which sorts of items they contain, so we can

EM would like everyone to know a few things. In case you have not listened to or read Kalem's words before, please allow him to enlighten you. He will however miss out on a few points here and there (due to time). Here are Kalem's Rules on Watchful Eye, an unscientific compilation of thoughts on this site and other sites regarding the legacy of Numan Haftan. 1. The Numan Haftan affair will always be a mystery to us. It will be a mystery also to Numan Haftan. 2. You must forgive everything/anything/one. 3. You must forgive everyone. 4. You must forgive yourself 5. You must forgive your own ignorance. 6. You must face anything and anyone that comes your way with a smile and a smile and an embrace. 7. You must forgive but you must know the consequences. 8. You must seek forgiveness from many. 9. You must meet the entire, from ALL walks of life. 10. You must stay connected with those whom you have hurt the most. 11. You must be with the old to the young, the young to the old. 12. Don't dwell on old grief. 13. Never fall into the trap of vengeance. 14. You must trust those who you have tied your fate to and those who had once betrayed you. 15. You must never get angry with the wind. 16. You must not forgive childish things. 17. You must always be there for those who were with you through thick and thin. 18. First you must forgive, then you can move on. 19. You must write openly about things that are not ideal. 20. You must find peace with what you cannot change. 21. Stay with who you are. Wednesday, February 23, 2009 "Personally, I think that Dr. Ahmad Aladin is a man of conscience. The question for me is whether the Arab media in the West, which no doubt is under his spell, can afford to withstand false charges of such enormity against their colleague, a friend for 40 years and the father of his country and his country's for nearly half a century. It is my greatest desire that Dr. Aladin is not only released, that his innocence stands vindicated, and that he has never been away from his family and his past, in which he has never sought to

Enceladus is a shoot'em up inspired by the Playstation & Saturn era infused with mechanical gameplay and modern artistic style. Easy to handle, skill will be needed in order to beat the 7 levels available. The player takes control of « Frost », a spaceship capable of firing energy blast or to channel a very powerful laser. He also has the ability to trigger a powerful explosion, ideal to get yourself out of trouble. The number one asset of « Frost » is his ability to teleport. By a simple push of a button, it is possible to create a ghost of Frost while still defending yourself. By letting go of that same button « Frost » teleports to the ghost's location. That technology allows you to move faster, to dodge overwhelming shots but also to gain acces to unaccessable zones. Teleportation needs practice, but once mastered « Frost » becomes so much harder to destroy. It's like a music video that can transform into a live performance. "Interstellaceae" is an early production. The last remix (Muzicbox) wasn't ready, so this version is far from perfect, but it has amazing potential and lots of fun moments. It was meant to be a soundtrack piece and should be listened with headphones. I've been using the beats of Interstellaceae as base of my future minimal floor tracks. If you like my work,
