“The players are so good at making replays you don’t need to see them,” said Jeff Bertrand, Head of FIFA and Pro Clubs. “There will be a few key moments that come from the data where you see a player cut in. The acceleration and deceleration, the real-life feel you can’t replicate on a computer.” Intelligent agent system: Players are now augmented with a new AI system that enhances player reactions, creates dynamic gameplay events and allows for very high-speed interaction between players. Agents now use Player Behaviour Engine, allowing for dynamic movement patterns based on the player’s positioning on the pitch. Agents react

to the game state, look at their surroundings to determine where they should attack and where they should defend. They know when to push forward, to initiate a counterattack, to defend a short ball or when to hustle back to defend a long ball. The agents have new situational awareness and are reacting to their environment faster than any previous version of the FIFA. Player Behaviour Engine drives all aspects of player movement in real-time. The engine makes players run, jump and throw based on their acceleration, deceleration, position on the field and how far away a play might be in the future. The game now has more inputs than ever before. The addition of GK Bindings, the ability to interact with the game using all gamepad inputs and buttons. “The look and feel has never been better,”

said Bertrand. “From a technical and visual standpoint, it was very important for us to have a game that feels truly like the real thing.”

REPLAYS: Under Armour Depth of Field system now creates a 3D representation of the virtual pitch from the player’s perspective. New camera work is used to create unprecedented camera angles. Players can be seen from their knees, elbows, shoulders, and heads, regardless of how far away they are. The camera work allows for exceptionally close perspective views, allowing players to perceive every detail on the field. The ‘Visual Action on Goal’ system is used to heighten the excitement when the ball is at the goal. As the player moves from the penalty area to the goal, the player’s appearance and reactions change based on where the player is on the

pitch.

Build a dream team of footballers including your very own FUT Pro who can be completely customised and developed. Or bring together the best

teams from around the world, with 19 teams ready for action. Create your team, evolve your tactics, manage players, and, most importantly, win glory in your very own game of football fantasy.

CONTROLS Every inch of the pitch is yours to control. Compete in 5 different ways to show the very best of your game.

Thumbstick controls – precision pass, dribble, shoot, use ball skills, and more. Every player has their own shot, speed, aggression, and finishing style, meaning that the controller is your ultimate tool.

Motion controls – these are actions controlled by the D-pad and face buttons for a completely new way to interact with the game, once used exclusively to play racing games. Whether you prefer to utilise the Right Stick, or use the face buttons to execute a short-range dribble, FIFA Ultimate Team LIVE has

you covered. Shoot-and-Drink – a highly intuitive and fluid way to play. With this new shooting style, you have the ability to place the ball in the air as you shoot. You can then use the Left Stick to aim the ball by dragging it towards the target to re-direct the ball, or to place it close to the target by using the Right Stick. You can also hold the button and drag the ball in the direction you want to shoot. Any player then has the opportunity to approach the ball and attempt to take a shot. Biggest revolution in FIFA – no more running-with-the-ball controls. All-New Player AI – Defend your team and keep possession by taking control of the ball. You can now run with the ball in any direction and your players will see you running in their direction and move to defend. They will also react to the movements of other players,

such as when they head-butt a defender. New Pass and Dribble animations – play any way you like. FIFA LIVE has a variety of pass and dribble animations that allow you to pick up the ball at different angles, speed, and power. So rather than simply running directly at a player to pass, you can perform a step-over or receive the ball by doing a diving header. Look beyond the ball – shoot and find out what happens next. Now you can

What's new in Fifa 22:

- **FIFA 22 rewards FIFA Ultimate Team players with season-long single-player and multi-player improvements to gameplay. Multiplayer: hone your club tactics against your friends, and compete against your favorite players in exclusive, downloadable, multiplayer challenges. Player Career: compete for greater rewards by adding and improving your squad in Specialist areas – or play against AI players for experience-based rewards. Embed Ultimate Teams in single-player story mode by entering a custom league, picking from the Ultimate League and defending a specific match. Add commentary to any single-**

player game, or play with fellow FIFA 22 fans around the world, and talk real-time strategy with them through in-game chat. (episode online)

- **Feature a new, expanded Player Reveal system that lets you find out about your team, players, kits, stadiums, teams, and opponents before the match begins. Player Models: get the best team and player avatars possible by adding up to 36 kits to your digital squad. Improvements to Player Movement: start moving before you see the player and get dropped like your life depends on it. Keep up with the ball, pass and complete advanced or defensive passes. Pass the ball anywhere you can into space, to the edge of the box and into the box where you can shoot. Cross the ball too — pin-point headers are easy. Keep an eye out for free kicks, and take advantage of knockdowns to turn defence into attack.**
- **Availability of online player models changes to FIFA Ultimate Team: players' model avatars are now made available on day one, rather than day five of the season.**
- **Overlays can now be disabled for better monitor visibility on the pitch.**
- **More in-play commentary by experienced real-time commentators. Matthew Riley and Lee Dixon highlight what is happening on the pitch.**
- **Game-play changes to create better and more realistic visuals.**
- **Off-ball actions and wall passes are more important in both attack and defence — they've been added back to the game.**
- **FIFA Ultimate Team delivers an expanded, immersive experience — players now wear brand new jerseys. These kits get unlocked after completing a particular objective or fulfilling**

certain conditions.

- **FIFA 22 introduces active defences for the first time ever. For the first time, you can**
