Show HN: My personal and public Google Calendar - pw ====== pw Cal's first draft: [ Visually, I want it to be unstructured, like a to-do list. On two days, I'm trying to design a highly visual but not touch-only approach. I'll try to finish the design by tomorrow. Google calls it the Google Assistant, and it's one of the most intriguing features of the new Pixel and Pixel XL phones. You'll find it in the Google app and on the lock screen, but it's also available on the phone, via what Google is calling the "Hey Google" hotword. During the launch event, I tried out the feature. The Pixel's stylus was what I used to tap the device's screen to ask the assistant a question. I was able to get things like movie recommendations and concert updates without lifting a finger. And if I didn't immediately respond to the assistant's question, it would continue to ask things until I either acknowledged it, or said the trigger phrase "Hey Google" to stop. This is truly incredible technology that I hope lives up to the hype surrounding the Pixel and Pixel XL phones. I'm most excited about the future of this assistant. I'd love to be able to use this feature on whatever smartwatch d0c515b9f4
