I did the job well, and i just want to say thanks to @LossinZ for his help. Downloading with the script i used before

"scriptblock.com" was very easy. This script will download a video from YouTube to the file location you specify. The destination file location must already exist. The script is pretty straight-forward.

You just need to change the source URL and the output file extension. It also has the ability to be run in the background.Q: Quick way to compare two lists of objects for number of identical objects? Is there a quick way to check the number of identical objects in two lists of objects? Sample of what I'm doing: list1 = [obj1, obj2, obj3, obj4, obj5, obj6] list2 = [obj1, obj2, obj3, obj5,

obj6, obj7] I want to be able to get a number that tells me how many objects in both lists are the same. Something like this:
equalCount = len(list1)-len(list2)
A: list1 = [1, 2, 3, 4, 5, 6] list2 = [1, 2, 3, 5, 6, 7] Try this:
[0]*len(list1).count(item) for item in list1) ==
[0]*len(list2).count(item) for item in list2) Output: True The numbers of duplicates in both are 6d1f23a050
