This gave you Lightroom Lite with essential features and a few other things that were decent, but not great. If you're a photographer new to Photoshop and Lightroom, I might recommend the Dark Horse Basic. It gives you all the features that most people need and nothing more. Lightroom 5 I believe is completely free, powerful, and provides much more than if you went down the Basic route in Lightroom 4. You can probably get used to Dark Horse Basic for free and get a good foundation, from there you can upgrade to a more powerful edition, if you want to. In my case, I'm mostly a Lightroom user. If one day I wanted to use Photoshop, in that case, I'd probably upgrade to Lightroom 5. I'm always amazed at how much power a free software tool has.
