Microsoft Office 365 PROJECT OFFICIAL..Q: How can I view the contents of a variable in Google App Script? I am writing a Google App Script which will interact with the Google BigQuery API. I have a variable that contains data from BigQuery that I would like to view in my script before using it. I have been able to use the Apps Script Logger, and google doesn't throw any errors or warnings, but I can't see any data in the Logger view. I have tried doing logging.info(string) and logging.debug(string) but nothing displays in the Logger view. Am I doing something wrong? A: You don't need to use the Apps Script Logger to see the contents of variables. You can simply create a log statement using the DEBUG parameter (i.e. logging.debug(variable)). Q: Como puedo llamar a una funcion de un class de ruby tengo el siguiente codigo: module A class B def target return false end end end En donde se supone que target me devuelve algo por cada llamada de c6a93da74d
