However, I use it diluted with a lot of water, that's maybe 4-6 times diluted. I've been told that I could buy a premixed solution of it, I even found a couple of stores who offered it and claimed it was 1:1, but they don't work anymore. I looked at your site, and there's a few options there, but the 1:1 premixed solution is nowhere to be found. Is there any way to get a solution of the commercial detergent at a 1:1 ratio? I don't need any fancy options, like something liquid to dissolve in the box/rubber tube. I just want it diluted into a jug. Thank you in advance! This is the first time I have purchased a private label product and they have a problem with it. I contacted them within a hour, they said they were going to get right on it and there would be a solution ready in a few days. I have not received anything, not even a e-mail. I am appalled and very unhappy. I have been told this is a small shop and they are just trying to get this sorted out. I have no problem dealing with you and the folks at LLL, but I am not satisfied with the response from the company. It just does not seem fair. I will deal with you and will not use the company again. Vitalia replies: I feel your pain. I bought a concentrated 12x solution at LLL in January and, when it arrived, it had been diluted to one-fourth the amount I had purchased. It's possible the company switched from a concentrate to a dispenser product without telling the customers. We will have a follow-up message
