Share for Review is a feature that is baked in to Photoshop CC 2017, available as a Slingbox mobile app, a browser plug-in or as an iOS app. Within the Share for Review version of Photoshop CC 2017, you'll see a choose from shared assets icon on top of all the thumbnails. You can access any of the assets you've shared in the past, as well as new ones from Stocks, Creative Cloud Libraries, and any shared assets in other Photoshop apps. If you haven't used Share for Review in a while, you can share assets annotating an image with the original version by saving the annotation to a location on your device as well as sharing those additional comments through the Share for Review app on the iOS device or the Share button on the iPhone or iPad. You might also want to also pick up the new Assets app in the Mac App Store. As with Share for Review you can access the same shared assets as you would in the browser, as well as add them to your Stocks app library. In Assets, you can also download the original versions of PSDs curated by Photoshop. To get started you'll have to download Photoshop CC 2017 from the Mac App Store. If you have a previous version of Photoshop on your iOS device, you can also use the same login credentials to access Share for Review in the same device. If you're using Photoshop CC 2018, you can access Share for Review on your iPhone or iPad. Once you've got Photoshop CC 2017, open the app. If you keep it open, you can just leave it running while you access your share and review assets in the Share for Review area on the screen or in the Feed tab (see below). If you're relying on the standalone Share for Review app, you can jump from your document to the browser to check in on the assets.
