What's New in the?

===== This

update fixes an issue with the Windows Update web site and update checks which prevented the user from downloading updates or receiving email about updates. In addition, this update also installs the current root certificate updates which were just recently released.

=====

How to use:

===== The Windows Update Fix for Win9x/ME updates Windows Update on your computer. To find out if Windows Update Fix for Win9x/ME is available for your product, go to the following Microsoft site: What to do

redirects the user to "". This included file can be deleted with the free utility "Unincluded.exe". The original content of "" can be accessed if the file "included.html" is deleted. A similar but non-redirecting situation is found in the content of the "about" page of the Internet Explorer. In that case the "IE.INI" configuration file has a line which causes the content of the site "" to be included in the content of the site ". Unfortunately this "included.html" file cannot be deleted. It cannot be deleted even with the Microsoft supplied utility "Configfix.exe". The included file

"included.html" in the content of the Win98se / 9x / ME "" has a line like: This line causes the image "images/
